

40
ANNUAL REPORT

OF THE

CHIEF PROTECTOR OF ABORIGINES

FOR THE

YEAR ENDED 30th JUNE, 1922.

41.

THE HON. MINISTER FOR THE NORTH-WEST.

.....

I have the honor to submit herewith my Annual Report on the condition and welfare of the aborigines in the portion of the State lying North of the 26th parallel South latitude, for the year ended 30th June, 1922.

The estimated number of the native population in touch with civilization throughout the Area covered by this report now stands at 11,611, showing an increase of 1150 over the figures for the preceding 12 months. The full-bloods and half-castes deemed to be aborigines show an increase of 1081 and 97 respectively, while the half-castes not deemed to be aborigines show a decline of 48. To the estimated number, however, must be added approximately 10,000 full-blooded aborigines inhabiting the unsettled portions of our Northern Areas, who except for Missionary endeavour have not come in close contact with the white man. Thus a grand total of approximately 21,611 natives is arrived at.

Ten out of seventeen stations report a decrease in population which is in most cases only slight, but at some of the other seven stations substantial increases are reported, notably from the East Kimberley District. Wyndham shows an increase of 566, Turkey Creek 153, and Hall's Creek 1909. A comparison with the figures of the preceding year shows that the aboriginal children have increased by 312 and the half-caste children by 9.

The condition of the natives throughout was reported to be generally good and employment plentiful, while their treatment by employers was satisfactory. Details of population according to Districts and other particulars will be found in the return at page 22.

HEALTH.

The general health of the natives throughout

was fairly satisfactory, though the presence of venereal disease was reported from several Districts, prompt steps being taken to have the patients attended to. There were nine deaths from this cause. At the close of the previous year ten natives were under treatment for venereal disease at the Port Hedland Depot, while twentyseven others were admitted making a total of thirtyseven. Of these thirteen were discharged cured, four died, and one absconded, leaving twenty under treatment on the 30th June, 1922. The proportion of cures still continues to be satisfactory and is mainly due to the use of Osceal Stibium, a new preparation of Antimony, which was first introduced by Dr. Dodwell Browne in another form. The report of Dr. Thomas Wilson, Medical Officer to the Depot, which follows, is interesting and indicates that if it were possible to treat all cases in the early stage the percentage of cures would be considerably increased:-

"With regard to the osceal stibium after trial I am glad to say that it is a most promising remedy. In the early cases which I got at Marble Bar and treat as out patients the results have been gratifying beyond anticipation. For example - a house gin was sent into Marble Bar for transit to the Lock Hospital, instead of which I gave her an injection of Osceal Stibium and told her to come every Thursday to receive an injection. This she did most willingly walking five miles each way in terrific heat so anxious was she for the treatment. She got her reward for after the third injection there was no trace of granuloma visible. This is a striking instance (inter alia) of the great advantage of early treatment. This of course is only one instance but the invariable tendency of granuloma is to go from bad to worse if left alone. Another case - here the Doctor refers to an European - after the first injection saw such a marked improvement that he thought he was cured. Unfortunately I was prevented visiting Marble Bar the following week and for want of injection he suffered a relapse. This is interesting both from the rarity of the disease among white people and from patients' conviction that the improvement was considerable after the single injection. The relapse distinctly points to the relation of cause and effect. A similar experience has occurred in the case of a half-caste a most intelligent man who has greatly benefited by three injections and came up to my surgery at Hedland on his way to Roebourne. The cases where a large surface is involved are yet subjudice but there are one or two striking cases which encourage hope that benefit may result even in these cases. On the whole I think it probable that if we could only get every case in its early stage to report the disease would be stamped out in a comparatively short time, and this I think will be easily done as the only thing that scares them away is the confinement in the hospital. There is good reason to believe the Osceal Stibium treatment is getting increasingly popular with the natives and they present

themselves/

"themselves with the greatest willingness for the injection not requiring the least pressure. There is no local reaction no pain or discomfort, a great point from the viewpoint of prophylaxis and most of them can be treated as out patients hence avoiding all the depression and ennui which seem to have such a bad effect on the natives' nutrition when in hospital".

As was indicated in my last report further enquiries have been made into the alleged prevalence of Venereal Disease in the vicinity of La Grange Bay, and I am able to state that with the exception of a few isolated cases, two of which have been under treatment for some time the district appears to be free from disease of this nature. The patients under treatment will be transferred to the Depot at Port Hedland at the first opportunity.

Towards the end of 1921 the investigation of Hookworm disease was begun under the direction of the Australian Hookworm Campaign.

This organisation is financed by the Commonwealth Government and the International Health Board of the Rockefeller Foundation.

Hookworm disease was found to be endemic in only one district in Western Australia, the Broome area including the Peninsula North of Broome to Cape Leveque, while odd cases were discovered at La Grange Bay and Derby. The remedial treatment of infected natives was at once commenced, and is still being carried on in conjunction with the Medical Department.

This treatment combined with improved sanitary conditions wherever possible should soon result in the disease being stamped out altogether.

An interesting report of the Investigation was issued from the Brisbane Headquarters of the Campaign in August 1922.

Fiftyfour deaths were reported as against seventyone the previous year. Ten were due to senile decay, while venereal disease accounted for nine others. At the Depot for Diseased Natives at Port Hedland there were four deaths.

The following statement shows the number of deaths reported and the causes thereof:-

Cancer	1
Childbirth	4
Cold	1
Convulsions	1
Fever	5
Heart Disease	6
Influenza	1
Natural Causes	5
Thirst	1
Pneumonia	3
Senile Decay	10
Suicide	1
Tribal Fighting	1
Tribal Murder	1
Tuberculosis	3
Veneral Disease	9
Meningitis	1
	<u>54</u>

RELIEF.

Relief in the shape of food, clothing, medicines, and medical attendance, has been regularly supplied at twentythree rationing stations scattered throughout the North, including three Departmental Settlements and four Missions. The cost of food supplies, including tobacco, amounted to 23757. 6. 2, being slightly less than for previous year. The total number of natives rationed monthly was 398 as against 437 during the previous year. Blankets, numbering 672 were distributed through these Relief Stations, while clothing, totalling 1113 garments, was provided in addition. The return at page gives particulars of the cost of rations distributed at the various Relief Stations.

LABOR CONDITIONS.

The table immediately following shows the number of natives employed under permit, giving place of issue and nature of permit issued. A comparison with the figures for the preceding twelve months shows that there has been an increase of 254 in the total number of natives employed. The total number of permits issued was 543 as against 532 for the previous year. Single Permits having increased by six and

General by ten.

CRIMES.

The number of convictions reported to the Department for the year was 139, being a decrease of 25 as compared with the previous year. The most notable reduction is in respect to cattle killing which has fallen from 38 in 1920-21 to 12 during the year under review. Again as in previous years the receipt of intoxicating liquor by natives accounts for the majority of offenses, no less than 85 convictions, an increase of 36 over the previous year, being directly due to this cause and contributing to a number of others. I am glad to say that no conviction for tribal murder has been reported.

The following table indicates the number and nature of crimes reported:-

	<u>1920-21</u>	<u>1921-22.</u>
Assault	8	8
Absent from Compound without permit	-	5
Breach of Contract	-	1
Carrying firearms	2	1

Rogue & Vagabond	-	2
Stealing	18	2
Supplying liquor to natives	-	2
Unlawfully on premises	1	-
" using a horse.	2	3
	<u>162</u>	<u>139.</u>

OFFENCES AGAINST ABORIGINES.

Twentyone persons other than aboriginals were convicted of breaches of "The Aborigines Act, 1905". There

were/

were nineteen convictions for supplying intoxicating liquor, one case of frequenting aboriginal camps and one of removing natives from one district to another without authority. In connection with the supply of liquor six persons suffered imprisonment from fourteen days to six months, and in other cases fines ranging from £1 to £100 were imposed.

CERTIFICATE OF EXEMPTION.

Six aboriginals applied for exemption in accordance with the provisions of Section 63 of "The Aborigines Act, 1905", three of these applications were granted and three refused.

RECOGNISANCES.

Permission was granted under Section 9 of "The Aborigines Act, 1905" to eleven persons to remove thirteen natives from one part of the State to another. Generally speaking the obligation upon employers to return natives to their districts has been satisfactorily fulfilled.

MOOLA NULLA ABORIGINES CATTLE STATION, EAST KIMBERLEY. It is regretted that the result of the year's transactions shows a loss of £1705.10. 6, reducing the accumulated profits to £4718.

The loss is mainly due to the unsatisfactory price realised for cattle brought South and sold in the Metropolitan market. Charter was arranged via Wyndham and owing to an accident the vessel in which the cattle were conveyed arrived some days behind schedule time landing the shipment on a full market and falling prices. Had the boat arrived on time the cattle would have met an almost empty market with consequent high prices. It also happened that whilst our cattle were travelling from the station to Wyndham for shipment they had to pass over burnt out country infested with Camel poison. Although mortality was not great from this cause the whole of the mob

was more or less affected with the result that many of the beasts lost condition.

For the previous year cattle sales amounted to £5600 as against £3441 received this year, or £2195 less.

The tannery has again shown a profit on the year's operations and there is an increasing demand for leather tanned at the station.

In order that all hides from Mocla Bulla and Violet Valley Stations may be turned into leather the matter of enlarging the tannery, referred to in my last year's Report, has received approval and an amount for this purpose has been noted on the current year's estimates. When the building is completed and further absolutely necessary equipment provided it is confidently anticipated that a most valuable industry will be opened up. In the past all surplus hides have been sent South for disposal but the amount realised has little more than paid cost of transport, handling, etc.

The running of the Hall's Creek-Fitzroy monthly mail service has resulted in a small loss, which is, however, quite outweighed by the benefit accruing to Mocla Bulla, and other stations en route. It is however considered that the Station should incur no loss in running this service and the Deputy Postmaster General has therefore been approached for an increased subsidy, which it is confidently expected will be granted.

The rainfall for the season amounted to 31.34 inches, and the season generally was a good one.

The stud cattle purchased in Queensland and referred to in my previous report arrived in the State during the year and pending shipment to Wyndham by the 'Bambra' in May were paddocked in the vicinity of Gingin. This stock comprising 6 bulls and 27 heifers includes a fine lot of animals all of which are entered in the Queensland Stud Book or are eligible for entry

The/

The consignment arrived at Wyndham in good condition and proceeded to Moola Bulla in due course.

The importation of these high class cattle, in addition to those previously imported, should soon result in a marked improvement to the Moola Bulla herd and other East Kimberley stock.

The report of the Manager, Mr. Thomas Woodland, to which is added a report on the condition of the natives at both Moola Bulla and Violet Valley Stations, the latter being also under the oversight of Mr. Woodland, is as follows:-

- "IMPROVEMENTS Well was sunk in centre of bullock paddock to a depth of 47 feet showing a very poor supply of water; a drive was then put in to a length of 7 feet but owing to the lack of explosives this work had to be abandoned. Troughing at Xmas well was taken up and lowered making it possible for small calves to water. New troughing has been erected at Douglas Well. Eighteen miles of fencing has had an extra barbed wire put in to hold Stud Cattle. New kitchen has been erected at home station.
- "YARDS. Lilly, Warloo and Police Yards have been put in order.
- "SEASON The season all through has been good, the water holes being all full in January and in March we had 1379 points, a record fall for that time of year. The grass at present is green in most places.
- "STUD CATTLE On the 1st July 1921 the studs numbered 16 bulls and 28 cows. 2 bulls have been branded, 2 were sold to Siddons Bros., and 1 transferred to Violet Valley. Two cows were transferred to Violet Valley leaving a balance of 17 bulls and 26 cows. We have 6 calves from stud cows.
- "HORSES These have kept their condition well throughout the year, the stallion Ghurka and 5 geldings were sold. 11 have been written off as dead, 76 foals branded, leaving a balance of 476.
- "MULES 17 of these were sold. 11 were branded, leaving a balance of 23.
- "MAIL SERVICE. The mail for portion of the year was carried by pack horse and the latter part by buggy. For the season 45 horses were used, 6 having died on the service. 252.7.- has been charged for passengers and 25.2.- for parcels.
- "TRANSPORT 50 Donkeys and Waggon were transferred from Broome and two teams are now employed carrying from Derby to Moola Bulla the method of paying for carriage is on a 50/50 basis computed at £25 per ton, the local rate of carriage, which proves more economical than paying wages.
- "TANNERY Sales of leather to the Public to the value of £280.8.- have been made. The price of leather was lowered from £2.10.- to £2.5.- during the year, and £160.17.- of leather was used on station, making harness, saddles etc. £15.15.- of this was used on the mail. There is in stock in the tannery the following - in salt 28 sides, in tan 130, in currier's shop 70, finished leather 109, estimated to be worth £75.
- "HERD CATTLE On July 1st, 1921, the herd numbered 12355 and 2649 were branded during the year. 10 bullocks were sold locally as meat. 156 bullocks and 13 cows

"were transferred to Violet Valley Relief Depot,
 "122 bullocks and 16 cows were killed for station
 "meat and 174 bullocks and 25 cows were killed for
 "indigents at Moola Bulla. 11 bullocks and 3
 "cows were killed for use at Carrington Weir.
 "215 heifers and 7 bulls were sold to Violet Valley
 "8 bulls were sold to Siddons Bros., also 500 heifers
 "and 1 bull to Hay and Overhea. Deaths for the
 "year are estimated at 54 making 787. This leaves
 "a balance of 14957, an increase of 1501 for the year.
 "GENERAL Eight permanent hands including the Mail
 "driver have been employed throughout the year, and
 "a blacksmith and pumping hand part of the year. An
 "average of 40 natives have also been employed on
 "station work.

"CONDITION AND TREATMENT OF NATIVES AT MOOLA BULLA
 "AND VIOLET VALLEY.

"Natives were brought in from Start River and convicted
 "for murder. These were desert natives some two
 "hundred miles from here. Some old offenders for
 "whom warrants had been issued for cattle killing
 "were arrested at Violet Valley and convicted.
 "The health of the natives has been excellent, no
 "cases of sickness except minor ailments have occurred.
 "Native sports were held at Christmas, some 200 natives
 "gathering at both places and the gifts of tomahawks
 "mirrors, razors etc. were much appreciated.
 "Owing to the delay in transport no blankets or clothing
 "have been issued to date.
 "An average of 90 natives have been camped at Violet
 "Valley and 156 bullocks and 15 cows have been sent
 "there for their use. An average of 140 men, women
 "and children has been in the main camp at Moola Bulla
 "throughout the year and 199 head of cattle have been
 "killed for their use, also a ration of one stick of
 "tobacco weekly has been issued to all natives."

"VIOLET VALLEY NATIVE STATION, EAST KIMBERLEY:
 "IMPROVEMENTS

"The two and a half mile windmill was raised ten feet
 "at a cost of £15. About four acres of land has
 "been ploughed, fenced, and planted with cotton,
 "which looks very well. An average number of 90
 "natives has been camped at the Depot throughout the
 "year and 156 bullocks and 15 cows have been transferred
 "from Moola Bulla for the feeding of same. The season
 "throughout the year has been extra good and all stock
 "have done well. The usual two hands have been
 "employed and an average of six natives doing stock
 "work and four native women for domestic work. One
 "young Stallion by Mithras was sent to the Depot from
 "Moola Bulla. I consider the result and the working
 "of the Depot under the management of Mr. Burness
 "for the year has been very satisfactory".

VIOLET VALLEY NATIVE STATION, EAST KIMBERLEY. The Officer in
 Charge, Mr. Hector Burness, reported that the season had been a
 good one and that all stock were in good condition, although
 cattle tick had been troublesome and buffalo flies bad for
 a time after the rain finished.

58 calves, 15 mule foals, and 1 horse foal were

branded while 217 heifers and 8 bulls were received from
Moola Bulls as well as 167 killing cattle. 206 head of
cattle were killed during the year, 27 head for station use
and the balance, 181, to supply meat to bush natives in the
vicinity of the station.

There has been very little sickness amongst the
natives except two cases of venereal, an odd case of fever,
and the usual sore eyes when flies were bad. Three deaths
occurred.

The usual Christmas sports were held and prizes
consisting of tomahawks, razors, belts, handkerchiefs etc.
distributed.

LA GRANGE BAY FEEDING DEPOT, BROOME DISTRICT. Officer-in-
Charge Mr. G. D. Price. Practically the whole of the
natives at this Depot are well advanced in years and there
is but little prospect of them ever being able to do anything
to support themselves. Generally the health of the inmates
has been satisfactory although four deaths were recorded,
three from old age and one from venereal disease.

The average number of natives fed monthly was
59 and the cost for the year amounted to approximately
£1102.

DEPOT FOR TREATMENT OF DISEASED NATIVES, FORT HEDLAND. Mr. &
Mrs. Batty in charge. All the necessary buildings for the
proper conduct of this depot have now been completed, the
erection of kitchen to replace the old lean-to structure,
being completed during the year.

The depot continues to be well and economically
conducted and credit is due to the Orderly in Charge and
Matron for their devotion to duty and attention bestowed on
the unfortunate inmates.

The medical side of the Depot is dealt with in
my remarks under Health.

MISSIONS: At page 23 will be found a statement setting out in detail the operations of the various Missions.

The Manager of BEAGLE BAY MISSION conducted by the Pious Society of Missions, reported that in addition to the 70 natives subsidised by the State 150 had been provided for by the Mission. Slight increases in livestock are noted, while improvements consisting of a cattle dip and the clearing of a motor track from Broome to the Mission have been carried out. The average attendance of children at school has been 20, a slight decrease compared with the previous year.

Four births and four deaths were recorded.

The majority of the natives in the vicinity have suffered more or less from Hookworm Disease, which I have referred to more fully in the Health section of this report.

The Superintendent of the FORREST RIVER MISSION, conducted by the Australian Board of Missions, reported that there were over 600 natives within the influence of the Mission, 31 of whom were supported by the State and the balance, either wholly or partially, by the Mission.

The average daily school attendance has been 35 - 11 half-castes and 24 full-blooded aborigines.

The Mission has been free from any serious epidemics of sickness, although inmates have to some extent suffered from the usual seasonal complaints.

Two births, two marriages and 1 death were recorded.

The livestock, although the Mission has been able to provide its own meat from its own herd, shows a very creditable increase. Cattle have increased by 153, sheep by 43, and goats by 225. The wool clip for the year was 6 cwt.

Improvements consisting of the erection of a new church, two huts, stock-yards, and walls for girls' dormitory, have been carried out and an additional 3 acres of garden land has been cleared.

Ten acres have been under crop during the year and the vegetable requirements of the Mission have been raised on the spot. In addition to vegetables millet, cotton, and tropical fruits have been raised with very satisfactory results.

The Manager of the SUNDAY ISLAND MISSION, King Sound, stated that there were approximately 200 natives within the influence of the Mission, 36 of whom are maintained at the expense of the State, and the balance either wholly or partially by the Mission.

Four births occurred during the year, and six deaths were reported, the cause of death in four cases being attributable to old age.

The general health of the natives has been good.

Through ill-health Mr. Hadley is finding the strain of financing and managing the Mission rather too heavy and is negotiating with Australian Aborigines Mission Authorities to take over the management from him.

PORT GEORGE IV (HANOYER BAY) conducted by the Board of Missions of the Presbyterian Church of Australia. The Manager reported that there were approximately 400 natives within the influence of the Mission, 47 of whom were subsidised by the State and the balance either partially or wholly by the Mission.

Generally speaking the conditions and health of the natives have been excellent. Four births and five deaths occurred. Plenty of work has been offering for those willing to accept it, and in most cases there was a ready response.

School has been regularly held and the children appear to be making progress. The average daily attendance has been 14, all the scholars being full-bloods.

The conduct of the natives has been uniformly good. There has been an almost entire absence of quarrelling and fighting around the Mission and as far as can be ascertained also in the bush.

A further 5 acres of land was cleared during the year, bringing the total cleared area up to 20 acres. Fifteen acres have been cultivated and Rice, Pineapples, Cotton, Maize, Fodder Grasses, Sweet Potatoes, etc. grown with good results, except in the case of Sweet Potatoes, where the crop was a partial failure.

On account of its economic value special attention was paid to the cultivation of Upland Rice. The results have been very encouraging and it is intended to put larger areas under this crop in subsequent seasons.

A plot of about $2\frac{1}{2}$ acres was planted with Paddy, two acres of which was cut for grain yielding 24 bushels or a yield of 12 bushels per acre.

ABORIGINES ACT & REGULATIONS.

It is regretted that owing to the pressure of Parliamentary business the suggested amendments to the Aborigines Act, 1905, referred to in my previous reports could not be introduced to the House for consideration.

FINANCIAL.

A statement of receipts and expenditure on all accounts including Balance Sheet and Profit & Loss Account of Moola Bulla Native Station is appended hereto.

Owing to the splitting up of the Department into two Sections last financial year, a comparison of expenditure with that for the preceding year cannot be drawn as usual, but it can be pointed out that the Aborigines Trust Fund expenditure of the North-West section, after allowing for receipts credited to the Fund, was £185 below the Estimate.

The receipts from Moola Bulla Native Cattle Station which were paid over to Consolidated Revenue Fund amounted to £4542.14. 5 as against £6139. 2. 3 for the previous year.

Last year I spent about three months in the North on an inspection tour. Sailing from Fremantle in May I proceeded to Wyndham and travelled thence overland to Hall's Creek via the Ord River, then on to Moola Bulla and Derby. On the return journey to Fremantle from Derby most of the coastal towns were visited.

During my travels I was able to visit a large number of stations, particularly in the remoter parts of Kimberley and look into the condition and treatment of the natives. I was also able to visit the Forrest River Mission near Wyndham.

There were some hundreds of natives camped in the vicinity of the Mission at the time of my visit and I was thus able to ascertain that the condition of the people in this part of the country was satisfactory.

At the Mission the health of the inmates was excellent and everything possible is being done for their care. The progress made by Mr. Gribble the Manager, and his Staff, in reaching out and getting into touch with these uncivilised people is quite remarkable. I am glad to say that this Mission has this year for the first time accepted the charge of half-caste and aboriginal waifs and strays sent to its care and subsidised by the Department, ten children being sent in during the year.

Generally speaking throughout my tour I found the natives being well cared for by their employers, but found an increasing number suffering from partial or total blindness, not only old but young people. On my return I urged the advisability of having a medical inspection of the natives right through the North in order to ascertain the full extent of the prevalence of Venereal Disease, Leprosy or other complaints, and I am hopeful that something

in this direction will be undertaken in the near future.

In conclusion I desire to once again thank Honorary Protectors, Police Officers, and others throughout that portion of the State coming within my jurisdiction who have assisted in the care of the natives, for their services during the year.

I regret that the presentation of this report has, owing to unavoidable causes, been so long delayed.

May, 1923.

THE

ANNUAL

REPORT

O F

THE DEPUTY CHIEF PROTECTOR OF ABORIGINES

FOR THE YEAR ENDED

30th JUNE, 1922.

THE HON. COLONIAL SECRETARY

I have the honor to submit herewith my annual report for the year 1921-22, in regard to the Aborigines south of Parallel 25° South.

The condition of the natives, generally, has been good, and, apart from some isolated cases of influenza followed by pneumonia, sickness has been no more prevalent than at normal times.

Employment has been plentiful, and the conduct of the natives good.

The native population totals 4,894. Compared with the population for last year, there is a decrease of 33.

Of the total population, aboriginals or half-castes deemed to be aboriginals under the Act number 4,530; adults 3,619 and children 911. Half-castes not deemed to be aboriginals under the Act number 364; of these 249 are adults and 115 children.

In regard to the employment of half-caste girls, in many instances the Department arranges for portion only of the girl's wages to be paid to her, the balance is paid to the Department and banked on the girl's behalf, so that when money is needed for clothing or other purposes it is available. Were this procedure not followed, I am afraid in many cases the Department would be called upon to assist stranded half-caste girls, who, generally speaking, have no more regard for the value of money than the full-blooded native has. There are altogether 99 Savings Bank accounts in operation

Relief (which includes food, clothing, medicines and medical attention when necessary) is supplied at various centres. The total cost of rations (food) supplied during the year was £5,053, as compared with £4,940 for last year; being an increase of £113 over the previous twelve months' expenditure.

BLANKETS AND CLOTHING.

The whole of the clothing required for natives throughout the State was manufactured at the Carrolup River and Moore River Native Settlements; we also manufactured clothing for the Old Men's Home and Lunacy Department. The total number of garments manufactured was 6,049.

The following clothing and blankets were distributed during the year:-

Dresses	780
Shirts.....	726
Undershirts.....	559
Trousers.....	583
Girls' underclothing....	384
Blankets.....	847

In addition, a large quantity of secondhand Military clothing was repaired, made serviceable, and used on the Settlement.

LABOR CONDITIONS.

For the year 232 permits were issued for the employment of 617 natives.

Recognisances were granted to two persons to remove 8 natives to other districts.

(3)

Place of Issue	Nature of Permit issued & No. of natives authorised to be employed thereunder.				Totals

Fremantle	-	-	5	5	5	5
TOTALS:	56	463	175	154	232	617

Three native children were delegated to the care of guardians.

Eleven natives were removed to the Settlement under Section 21 of the Act.

DEATHS.

The total number of deaths reported for the year was 97, details of which are hereunder:-

Accidental	3
Asthenia	-
Bronchitis	6
Thirst	2
Measles	1
Gastro Enteritis	4
Tetanus	1
Heart Failure	7
Cancer	1
Influenza	13
Kidney trouble	2
Stillborn	4
Natural Causes	6
Not specified or unknown	5
Pneumonia	17
Phthisis	1
Peritonitis	3
Senile Decay	9
Rheumatic fever	1
Tuberculosis	11
<u>Total :</u>	<u>97</u>

CRIMES.

During the year 68 convictions were reported to the Department for crimes committed by aboriginals, the convictions being to a large extent on account of drunkenness and disorderly conduct, and stealing. The following are details of the convictions reported:-

Assault	1
Carrying a gun without a license	3
Drunk	31
Disorderly conduct.	6
Escaping from custody	2
Loitering	1
Receiving liquor	8
Cruelty to animals.	1
Stealing.	13
Unlawful possession	1
False Pretences	1
<u>Total :</u>	<u>68</u>

OFFENCES AGAINST ABORIGINALS.

Five convictions for offences against aboriginals were reported, all being for supplying liquor. Fines aggregating £100 were inflicted on the offenders.

CERTIFICATES OF EXEMPTION.

Six applications were received from aboriginals for exemption under Section 63 of the Act. Two applications were granted, and four refused.

NATIVE SETTLEMENTS.

For some time it has been evident that the number of natives it was necessary to detain in the Settlements did not warrant the keeping of two Settlements operating in the Southern portion of the State, and whereas Carrolup River Reserve is, in regard to the quality of the land, the best, it is unsuited climatically for the confinement of natives from

the dry areas; on the other hand, the climatic and other conditions at Moore River Reserve make it imminently suitable for natives from any part of the Southern portion of the State. On 30th June the Carrolup River Settlement was closed and the natives transferred to Moore River. A considerable saving will be effected, and in addition the Carrolup River Reserve, which comprises 11,000 acres with substantial improvements, will eventually be handed over to the Lands Department for agricultural settlement, or other use, as that Department may decide.

Although the transfer of the natives from Carrolup River Settlement necessitated the erection of additional buildings at Moore River, which are now in course of construction, the consequent saving on the closing of Carrolup will, during the first year, exceed £1,500. The number of natives at the Moore River Settlement after the transfer of the Carrolup People was 306.

Whilst the two settlements were operating there were six officers at each, making a total of 12; the staff at Moore River now consists of eight officers, showing a reduction of four, including one Superintendent and one Matron. The Moore River Settlement is under the charge of Mr. and Mrs. Campbell (as Superintendent and Matron), who have proved themselves most capable officers.

The year 1921-22 is the first year it has not been necessary to buy horse fodder. This year we have 100 acres under wheat and oats for hay at Moore River, and the prospects of a good yield are excellent.

During the past year a commencement was made with the manufacture of clothing at Moore River, and in future we will manufacture the whole of our requirements at this settlement, in addition to any orders we receive from other Departments.

An oil engine and pump have also been installed at Moore River, and water is now being pumped from the river

to elevated tanks; pipes are being laid to convey the water to the various buildings, which will considerably improve living conditions.

FINANCIAL.

A statement of receipts and expenditure for the year 1921-22 is attached.

. . .

In conclusion, I wish to record my appreciation of the assistance rendered during the year by the Commissioner of Police and his officers, also the Honorary Protectors.

DEPUTY CHIEF PROTECTOR OF ABORIGINES.
