THE

ANNUAL REPORT

OF

THE DEPUTY CHIEF PROTECTOR OF ABORIGINES,

FOR THE YEAR ENDED

30TH JUNE, 1921.

\*\*\*

DAY OF \_\_\_\_\_\_\_ 1921.

THE HON. COLONIAL SECRETARY.

I have the honor to submit herewith my annual report for the year 1920-21.

During December, 1920, the control of the Aborigines was divided, and I was appointed Deputy Chief Protector of Aborigines in charge of the Aborigines South of Parallel 25° South, with the exception of coastal towns North of Geraldton. I am dealing hereunder with the Southern portion of the State for the whole year ended 30th June, 1921.

The condition of the natives generally has been very good and, apart from a little influenza, sickness has been no more prevalent than at normal times.

Employment has been plentiful, and the conduct of the natives good.

Compared with the population for last year, there is an increase of 564. Increases are noted in a number of farming centres, no doubt accounted for by work becoming more plentiful as settlement extends. The general increase in the figures may also be due, to a great extent, to the fact that as the country is becoming settled the Police are able to gauge the number of aboriginals more accurately.

of the total population, aboriginals, or half-castes deemed to be aboriginals under the Act, number 4,520; adults 3,607 and children 913. Half-castes not deemed to be aboriginals under the Act number 407; of these 283 are adults and 124 children. Statement "A" attached gives details of the population in various Police districts.

as domestics in the Metropolitan Area and various other parts of the State. In many instances the Department arranges for portion only of the girl's wages to be paid to her, the balance to be paid to the Department and banked on the girl's behalf, so that when money is needed for clothing or other purposes it is available. Were this procedure not followed, I am afraid in many cases the Department would be called upon to generally speaking, assist stranded half-caste girls, who/have no more regard for the value of money than the full-blooded native has. There are altogether 78 Savings Bank accounts in operation.

#### RELIEF.

Relief (which includes food, clothing, medicines and medical attention when necessary) is supplied at various centres. The total cost of rations (food) supplied during the year was £4,940, as compared with £4,438 for last year; the increase of £502 over the previous twelve months' expenditure being due mainly to the increased cost of food stuffs. Statement "B" attached indicates the average number of natives rationed, and the cost at various centres for the year, compared with the previous twelve months.

#### BLANKETS AND CLOTHING.

The whole of the clothing required for natives throughout the State during the year was manufactured at the Carrolup River Native Settlement. The total number of garment manufactured was 4,000. The following were distributed in the Southern portion of the State:-

Dresses						0	0			,		,	,	,	,			636
Shirts .																		440
Undershi	T	ti	3						,									652
Trousers																		
Girls' u	ın	de	91	0:	1	0	t	h	i	n	e e							313.

In addition, the following blankts and Military coats were issued:-

Blankets	0002020202020202020	574
	Overcoats	210
Military	Tunics	518

making a total number of blankts and garments issued 3,783.

#### LABOR CONDITIONS.

Statement following shows the number of natives employed under permit, with details as to place of issue, nature of permit granted, etc.

Place of Issue	of Na	e of Pen tives au mployed	Tot	al.

# CRIMES.

During the year 82 convictions were reported to the Department for crimes committed by aboriginals, the convictions being to a large extent on account of drunkenness and disorderly conduct. The following are details of the convictions reported: -

Attempted Murder	6
Assault	6
Breach of Brands Act	1
Breach of Droving Act	1
Carrying a gun without a license	2
Drunk	23
Disorderly conduct	13
Enticing inmates to leave Settlement	1
Escaping from custody	4
Exposing person	1
Loitering	1
Murder (tribal)	6
Receiving liquor	
Resisting arrest	2
Receiving stolen property	1
Stealing	10
Unlawfully on premises	4
Unlawful possession	2
Unlawfully wounding goats	1
	82
Total:	02

# OFFENCES AGAINST ABORIGINALS.

Four convictions for offences against aboriginals were reported, two being for supplying liquor, and two for co-habiting. In two cases the offenders went to gaol for three months each; in the other two instances fines amounting to £30 and £1, respectively, were paid.

# CERTIFICATES OF EXEMPTION.

Five applications were received from aboriginals for exemption under Section 63 of the Act. Three applications were granted, and two refused.

# CARROLUP RIVER NATIVE SETTLEMENT.

Mr. Blake, the late Superintendent, resigned his position on the 31st December, 1920, and Mr. Mitchell (the Superintendent, Moore River Native Settlement) was transferred to Carrolup.

During the year the Boys' Dormitory was completed. With this building available sufficient accommodation has been provided for present requirements, at least. One or two additional buildings may be necessary in the future, but at present we can manage without further expenditure in this direction.

Clearing and fencing work has progressed, and poison-grubbing and additional clearing is in hand. It is anticipated that at an early date now we will be able to run more sheep on this settlement, and without shepherding Up to the present the sheep have been shepherded, and althoug generally speaking, this has been successful, we did have one rather serious loss. However, there is some good feed country now fenced, and when the poison is removed the sheep can be placed on this land without further danger.

During January, 1921, an outbreak of

measles occurred at this settlement, followed in several cases by pneumonia, from which two children died. Otherwise the health of the settlement has been very good throughout the year.

The average number of inmates in Carrolup River Native Settlement during the twelve months ended 30th June, 1921, was 125.

#### MOORE RIVER NATIVE SETTLEMENT.

Upon the transfer of Mr. Mitchell to Carrolup River Native Settlement, Mr. John Campbell was appointed Superintendent at Moore River, and took up duties in February, 1921.

During the year a large children's diningroom was erected, also a store and office. Both of these
buildings were very much needed. The buildings which are
still required are a boys' dormitory, a kitchen or cookhouse to be attached to the dining-room, and a small structure to be utilised as a hospital. The want of a building
to accommodate the sick has been keenly felt, but as other
structures have been more urgently needed the erection of a
hospital has had to be postponed.

out, and about 60 acres planted for hay. The land, generally speaking, at this settlement is very poor sand country, and practically useless. We are, however, able to work the river flats, but the maximum area of land available for cultivation is very limited, although we hope to be able to plant something near 100 acres next year, and thereby produce all our fodder requirements. Under the very best conditions I cannot see how this settlement can ever become a self-supporting proposition. Even the land which is fit for cultivation is in small scattered areas.

The well that was sunk during the previous

6.

year and collapsed, has been cleaned out and re-timbered where necessary, and although information previously obtained indicated that the well would be a source of constant and good water supply, the latest reports shew that the supply of water is very limited, and it has, therefore, been decided to rely on one of the river pools for a supply of water for general settlement uses.

The health of the natives throughout the year under review was good. During the year Dr. Hennessy was appointed District Medical Officer at New Norcia, and arrangements made for him to visit the settlement when required. Hitherto it has been necessary in cases of severe illness to send the patients to Perth for treatment. Dr. Hennessy's appointment will overcome the necessity for this procedure in future, and will be a decided benefit to the inmates and staff generally.

The question of manufacture of clothing for other Government Departments has been under consideration for some time past, but only carried out on a very limited scale until recently. Arrangements have now been made to carry on this work to a greater extent, and in order to allow for this, a sewing factory has been commenced at Moore River Settlement. The native and half-caste girls make very good seamstresses, and the work already carried out has given entire satisfaction to the Departments concerned; a considerable saving in cost is effected.

# MISSIONS.

At the beginning of the year there were three half-caste and native missions in operation, namely, the New Norcia Mission, the Salvation Army Girls' Home, Kalgoorlie, and the Swan Mative and Half-caste Mission, each of which were subsidised. During the year the Salvation Army Girls' Home and the Swan Native and Half-caste Mission

were closed. Those inmates who were old enough and suitable were placed out to employment, and others were sent to the settlements.

The total amount paid to the Missions as subsidies during the year was £202. Owing to the closing of two of the Homes the expenditure in this direction will be considerably reduced.

#### FINANCIAL.

A statement of receipts and expenditure as required by the Act will be included in the report submitted by the Chief Protector of Aborigines, who is administering the Aborigines Act in the Northern portion of the State.

In conclusion, I wish to record my appreciation of the loyal support given me by the Office Staff, also the Staff at the two settlements. The satisfactory work carried out at Moore River and Carrolup River Settlements is largely due to the hearty co-operation of the Superintendents and their Assistants.

The thanks of the Department are also due to the Commissioner of Police and his Officers, and the Honorary Protectors, for their assistance in the administration of the Act and care of the Aborigines throughout the area under my administration.

26/9/21. C/J.

DEPUTY CHIEF PROTECTOR OF ABORIGINES.

# ANNUAL REPORT

OF THE

# CHIEF PROTECTOR OF ABORIGINES.

FOR THE

YEAR ENDED 30TH JUNE, 1921.

office we will a perfect.

THE HON. MINISTER FOR THE NORTH-WEST.

I have the honor to submit herewith my Annual Report for the year ended 30th June, 1921.

In consequence of my appointment to the position of Secretary to the Department of the North-West from the 1st November last, it was deemed advisable to relieve me of portion of the duties attached to the Office of Chief Protector of Aborigines. It was, therefore, atranged that the District over which I should have jurisdiction as Chief Protector should embrace all that portion of the State North of the 25th degree parallel, including coastal towns North of Geraldton, while the care of the natives South of that limit was placed in charge of Mr. F. Aldrick, Chief Inspector of Fisheries, who was also appointed Deputy Chief Protector of Aborigines in accordance with the provisions of Section 7 of "The Aborigines Act, 1905". This change involved the transfer of several members of the staff of the old Department to the Department of the North-West, as well as a division of the records and accounts.

The estimated number of the native population in touch with civilization throughout my District which now stands at 10,481, has undergone very little variation, having only decreased by sixtytwo. The full-bloods, however, show a decline of 349, while the half-castes have increased by 287. To the estimated number, however, must be added approximately 10,000 entirely uncivilized aborigines inhabiting the unsettled portions of our Northern areas, making a grand total of approximately 20,481 natives within the District defined in the limits referred to in the foregoing.

while the majority of Stations reported an increase in the numbers of the people during the year, this was discounted by the comparatively large decrease in the Junction, Broome, Derby and Pender Bay Districts. The number of aboriginal children is less by 134, but the half-caste children have increased by 102 over last year's figures.

The condition of the natives throughout, and their treatment by employers, were reported to be generally good and employment plentiful. Details of population according to Districts and other particulars will be found in return at page 23

#### HEALTH

The general health of the natives throughout was fairly satisfactory, though the presence of venereal disease was reported from several Districts, prompt steps being taken to have the patients attended to. There were eleven deaths from this cause. At the close of the previous year twentyfive natives were under treatment for venereal disease at the Port Hedland Depot, while twentytwo others were admitted, making a total of fortyseven. Of these thirty were discharged cured, six died, and one absconded, leaving ten under treatment on the 30th June, 1921. The proportion of cures is highly satisfactory, and is mainly the result of the adoption of the Castellani Method of Antimony Injections, which has been practised since the Depot was opened in 1919. It still remains to be seen, however, whether the cure apparently effected is permanent. In this connection the following report submitted by Dr. Thos. Wilson, District Medical Officer, Port Hedland, is of interest:-

> "Since 1st October, 1920, the date of my taking "office, the average number of patients in the "Hospital has been maintained at its usual level. "The method of treatment by intravenous injections "of Antimony Sulph. was persisted in for some "months, but a formula having been published which "rendered it possible to use the drug intra-muscularly without serious local reaction following this "method was adopted. The practical advantages of "this method are obvious. Hospital care is not "necessary in many cases, and in the case of the "aborigine it is a great advantage to eliminate the "element of fear and apprehension which attends the "intravenous injection, he being too unsophisticated "to be amenable to reason on the subject. "natives have no hesitation in submitting themselves "to the intra-muscular treatment except occasionally "when it may be that one or two may exhibit a more "severe local re-action than the average. "injections can be given frequently - every other

" day - a great advantage, and it is to this that "probably the great and rapid improvement which "manifested itself after the introduction of this "method is due. Several chronic cases which were inert "or retrogressing showed rapid improvement which "continued until they were sufficiently well to be "discharged in every case, a margin of convalescence "being required before discharge which gave some "guarantee of permanence to the cure. Males give more satisfactory results (in the case of granuloma which Males give more "is the only disease under consideration, other venereal "diseases not having come under treatment with few "exceptions) than females, two of whom so far from "improving grew worse. These were treated with "improving grew worse. "Collosol Antimony but unfortunately the small supply "at the moment available did not admit of the larger "dosage which was probably indicated in these cases. "One of these patients has recently died but the other "is showing signs of improvement, which, as she is "usually tolerant of the treatment, it is conceivable "may be continued. An epidemic of influenza occurred "may be continued. "in March and it seemed advisable to suspend the inject-"ions for three weeks. The same thing occurred in May -"June and the same precaution was taken - happily, for "in each period there was a death and there is little "doubt that the native logic would have seen cause and "effect had the treatment been continued. Thus the "difficulty would have been much increased. Possibly
"preparations such as Oscal Stibium, which has been
"used successfully intra-muscularly in leprosy, or
"Collosol Antimony might be more desirable from the
"point of view of local re-action, there being absolut"ely none in the case of these preparations, but the "pain and swelling are not at all formidable or common "in the case of the solution I make routine use of. "From the standpoint of prophylaxis its simplicity of technique might allow of its use if there were no "objections to its general use. A system of perionic in the case of the uninfected might be A system of periodical "applied, and it probably would not be unacceptable to "the natives who are only deterred from seeking treatmen" "through fear of fatal results."

Venereal disease was said to be very

prevalent in the La Grange Bay District, and the District Medical

Officer, Broome, reported that he had treated fortyseven

cases during the twelve months, all of which had been contracted

from natives in the La Grange Bay District, but I have

failed to substantiate this and our Officer at La Grange Bay

Depot considers the reports are exaggerated. Arrangements

were, however, made to go further into this matter and were

in progress at the end of the year. Should the case be as

reported prompt action will be required to deal with it.

at the Beagle Bay Mission and it was suspected that the wasting disease which had carried away several natives at La Grange

Bay Depot might be attributable to the same cause. Arrangements were made for the Rockfeller Survey Party, under Dr. Baldwin, to visit this and other Native Settlements with a view to ascertaining the extent of the trouble.

Seventyone deaths took place, twentythree of these being due to senile decay, while tribal fights and murders were responsible for six others.

The following statement shows the number of deaths reported and the causes thereof:-

	Fever Heart Failure Internal Growth Leprosy and Heart Failure Malaria Natural Causes Paralysis Pneumonia Ptomaine Poisoning Senile Decay Thirst Tribal Fight " Murder Tuberculosis Venereal Disease Wasting Disease  71.

#### RELIEF.

Regular relief in the shape of food, clothing, medicines, and medical attendance, has been supplied at twentyfive rationing Stations scattered throughout the North, including three Departmental Settlements and four Missions. The cost of food supplies, including tobacco, amounted to £3,840/8/2, being a small increase over the previous year. The total number of natives rationed monthly was 437 as against 467 rationed during the previous year. Blankets, numbering 687, were distributed through

these Relief Stations, while clothing, totalling 1,299 garments, was provided in addition. The return at page 22 gives particulars of the cost of rations distributed at the various Relief Stations.

#### LABOR CONDITIONS

number of natives employed under permit, giving place of issue and nature of permit issued. A comparison with the figures for he preceding twelve months shows that there has been an increase of twentyfour in the total number of natives employed. The total number of permits issued was 532 as against 552 for the previous year. Single Permits having decreased by fortyfive and the General increased by twentyfive.

#### CRIMES

The number of convictions for crime reported to the Department for the year was 162, being an increase of twentysix over the previous year. As usual crimes due to the receipt of intoxicating liquor by the natives are in the majority, no less than fortynine convictions being directly due to this cause, and contributing to a number of others. Tribal murders have increased, the immutable "lex talionis", combined with the theft of women, being mostly responsible. Cattle killing has increased and there were thirtyeight convictions from this cause. Contrary to the usual order of things nearly all cases of cattle killing occurred in the East Kimberley District, and several within a comparatively short distance of Violet Valley Relief Depot. explained, however, in extenuation, that the majority of the depredations were mostly carried out by natives on the West side of the Durack Ranges, known as coastal natives, who seldom journey as far inland as either Moola Bulla or Violet

Valley. Others occurred on a Station, which at the request of the management, has not been patrolled by the Police for many years, even though the Station followed the practice of regularly killing for visiting natives, as indeed was the case on other Stations where arrests were made. Several of these cattle-killing aboriginals were sentenced to five years imprisonment with hard labour, and in their interests and also in the interests of their dependents left behind to eke out a precarious esistence as best they might, I deemed it my duty to protest against the severity of the sentences. I have geferred to this matter several times in my various reports and have pressed the point that they only solution of the difficulty is the provision of Native Stations or Depots having for their object the feeding and care of bush natives such as these. The majority of the convicted natives evidently travelled long distances from the unsettled portions of the Kimberleys, where native game was probably scarce, to where they knew cattle were grazing and therefore obtainable, and their lust for meat is such that nothing will prevent them from killing to obtain it except the properly regulated In spite of the heavy provision of ample supplies of meat. cost incurred, imprisonment acts as no deterrent, and it would be infinitely preferable could these people be profitably employed in working on Stations run for their benefit, making roads, or preparing country for tropical culture. I have recommended that at least two additional Stations or Depots be established in the West and North-Westof Kimberley preparatory to opening the country to further settlement, and the Expedition now traversing that District has been asked to report as to a suitable site for one such establishment.

The following statement indicates the number and nature of crimes reported:-

	1920-21	1919-20
Assault Carrying firearms Cattle killing. Cruelty to animals Deserting tribal husband Deserting service Disorderly Drunk Escaping from custody Goat killing Murder Obscene language On prohibited area Receiving liquor Removing boat from moorings Resisting arrest Stealing Unlawfully on premises	1920-21 8 2 38 1 9 14 7 4 7 14 35 2 18 1 2 162	12 12 12 26 2 -5 12 14 5 4 3 1 5 18 -1 19 4 2 2 2

#### OFFENCES AGAINST ABORIGINALS.

Eighteen persons other than aboriginals were convicted of breaches of "The Aborigines Act, 1905". There were sixteen convictions for supplying intoxicating liquor, one case of harbouring a female native, and one murder. In connection with the supply of liquor six persons suffered imprisonment from fourteen days to six months, and in other cases fines ranging from £10 to £25 were imposed.

# CERTIFICATE OF EXEMPTION.

Three aboriginals applied for exemption in accordance with the provisions of Section 63 of "The Aborigines Act, 1905", two of these applications were granted and one refused.

#### RECOGNISANCES

Permission was granted under Section 9 of
"The Aborigines Act, 1905" to eighteen persons to remove
twentythree natives from one part of the State to another.
Generally speaking the obligation upon employers to return natives
to their Districts has been satisfactorily fulfilled.

MOCLA BULLA ABORIGINES CATTLE STATION, EAST KIMBERLEY: There was a change in the management of this Station. Mr. Thos.

Woodland, late of the Ord River Station, was appointed

Manager in place of Mr. Arthur Haly, and entered upon his duties on the 23rd March last. The services of the late

Manager, Mr. Haly, were loaned to the Wyndham Meatworks, it

was understood for six months from the 1st January, 1919, but it was not until July 1920 that this Officer was permanently transferred, so that the Station was unfortunately without a fully qualified Manager for a period of over two years.

I regret that the result of the transactions for the year disclose a loss of £1,155/10/1, reducing the accumulated profits to £6/422/4/9. While the expenditure has increased in some directions the aggregate to the debit of profit and loss account is normal, showing that the loss has been occasioned by shrinkage in revenue.

Cattle sales, which last year amounted to £ \$,260, this year, totalled £5,600, or £2,600 less. On account of the Wyndham Meatworks not operating we were unable to dispose of cattle to the usual number and the price realized after shipment South was £2/15/- per head less, after deducting expenses, than the average price realised at the Wyndham Meatworks.

There has also been a loss on hides, a smaller quantity being available and the price being very considerably less than during the previous year.

In considering the Profit and Loss Account the main purpose of the Station which is to supply killing cattle and other relief to natives who might otherwise help themselves at the expense of pastoralists, is apt to be overlooked. It is an undoubted fact that the establishment of this and Violet Valley Stations is saving the State an annual expenditure of many thousands in other directions, an expenditure which before their establishment was estimated to be something like £10,000 a year.

In accordance with the Government's announced intention of introducing stud cattle for the purpose of improving the herds in the Kimberleys, not only from the point of view of the Moola Bulla Station and the Wyndham Meatworks, but also with a view to providing for the requirements of new settlers, a number of valuable animals were purchased in Queensland, the selection being undertaken by Mr. Arthur Haly, late Manager of Moola Bulla Station. The share allotted to Moola Bulla Station comprises six bulls and thirtyone heifers. All this stock is entered, or is eligible for entry, in the Queensland Stud Herd Book, with the exception of eight heifers which are pure bred and entered in the appendix of the Stud book.

On account of the difficulty experienced in arranging economically the satisfactory transport of stores from Derby to the Station, after trying almost every other means, it was decided to purchase a donkey team and it is hoped to effect considerable savings in this direction in future.

The tannery has shown a small profit and the demand for leather continually increases, so much so that the Station cannot meet it. Following upon the exhibition of samples of Moola Bulla leather in Perth, several enquiries have been received, including one from Java, and the muestion of extending the tannery and supplying up-to-date equipment has been under consideration. At present the tannery can only take a limited portion of the hides available at Moola Bulla and Violet Valley Stations, the majority having to be sent South for sale, which, at prices lately ruling, has done little more than pay expenses. With a tannery capable of dealing with all hides, numbering about six hundred annually, there is no doubt that a most profitable business could be opened up.

The Hall's Creek-Fitzroy monthly mail service conducted by the Station showed a slight loss, but a fresh agreement was entered into with the Deputy Postmaster General in May last, under which the subsidy was increased by £75 per annum, which should enable the service to be carried on in future without loss. The utility of this service is unquestioned, and it has been faithfully performed though sometimes under considerable difficulty.

The rainfall for the season amounted to 29.69 inches, the annual average being about 21 inches. Nevertheless, as explained by the Manager in his detailed report, drought conditions prevailed for the greater part of the season. The following is the report of the Manager, Mr. Thos. Woodland, to which is added a report on the condition of the natives at both Moola Bulla and Violet Valley Stations, the latter being under the oversight of the Manager of Moola Bulla:-

"SEASON: Up to February the season was a very poor one.
"The greater portion of the run was devoid of grass. In
"September 209 points of rain were recorded at the Head
"Station, this rain was general over the run, filling the
"waterholes and billabongs, but making no grass. Thunder"storms occurred in November and December, 369 and 119 points
"of rain were registered, respectively, but only 15 points
"of rain feell in January. In February steady rain set in,
"1,543 points feel, followed by 675 points in March, which
"made a good growth of grass.
"IMPROVEMENTS: A well situated five (5) miles North-West
"of the Head Station, which last year owing to the lack of
"explosives, was in an unfinished condition, has now been
"completed. The well is sixty feet deep, and carries a
"supply of 250 gallons of water per hour; a forty foot
"tower, two squatters tanks, sixtysix feet of troughing,
"pump and necessary items have been erected to equip the well.
"This well serves two paddocks of approximately 5,500 acres
"in area enclosed by 8 miles 3.67 chains of fencing, two
"wire, and six flood gates. These paddocks are intended
"for the use of the stud cattle as soon as the fences are
"rendered proof against the encroachment of herd bulls.
"Boring for water was undertaken in the centre of the
"bullock paddock. Two bores proved unsuccessful but the
third struck water; in all 73 ft. 6 ins. were bored. A
"well is now being sunk in the site of the third bore, but
"progress is slow owing to inferior explosives.

On the 29th June the construction of
"Carrington Weir was commenced.
"HERD CATTLE. On the let Tuly 1020 the herd numbered

"Earrington Weir was commenced.
"HERD CATTLE: On the 1st July 1920 the herd numbered
"14.037. Four hundred and thirtythree bullocks were
"shipped to Fremantle, fiftyfour were sold locally, two
"hundred and twentytwo mixed cattle were transferred

```
"to Violet Valley Relief Depot, one hundred and sixty-
"nine were killed for station use, and two hundred
"and thirtytwo were killed for indigent natives.
                              As the losses were heavy,
"calves were branded.
"owing to drought conditions, it has been deemed "necessary to allow 1,347 for mortality, being a "decrease of 680 for the year.
                         Considering the season the stud cattle
"STUD CATTLE:
"have done well.
                         One two year's old cow has died.
"Twelve heifers and thirteen bulls were branded.
"There are now eighteen bulls and twentyeight heifers
"the increase for the year being twentyfour.
"HORSES:
                  Horses have kept condition fairly well
"throughout the year.
                               Fortyone foals were branded,
one young stallion and ten horses have been sold.
"Sixteen have been written off as dead and missing,
"leaving a balance of four hundred and seventeen,
"being an increase of thirteen for the year. All
"the stallions are in good condition, there has been
"no horses affected by "Kimberley Disease" throughout
                 Stud fees amounted to £66/3/-.
"the year.
"MULES:
                  Six mules were branded, two are missing
"there are now thirtynine mules on the Station being
"an increase of four.
"MAIL SERVICE: The Mail Service Hall's Creek-Fitzro; "Crossing has been carried on principally by packhorses "during the year, but a mail buggy purchased by the "Department is expected to arrive shortly. The two "wells proposed to the Road Commissioner, Hall's Creek "here are still two long, dry
                         The Mail Service Hall's Creek-Fitzroy
"hate not been sunk so there are still two long, dry
"stages on the mail route.
                                      Twentyfive horses have
"been used in the service.
"TRAINEES:
                  Under the guidance of Mr. M. O'Connor
"the country to the North West of the Station was
"inspected by four soldier trainees. Owing to the "drought Mr. O'Connor's horses were in low condition,
"and in consequence the expedition took some consider-
"able time on the journey. Eight hundred and fort seven miles were traversed from the 21st August to
                                       Eight hundred and forty-
"the 10th November. Some good patches of cattle
"country were found, with poor country intervening,
"but as the distance was so remote from any settlement
"no country was taken up. There are now no trainees
"no country was taken up.
"remaining on the Station.
"TRANSPORT: A team of forty donkeys, with harness
"was purchased, and are employed carrying from
"Fitzroy Crossing to Moola Bulla.
                   The termster complains of the bad state
"of the road, no repairs have been effected for four
"years and the last season's rainfall in the Fitzroy
"country has caused many washouts, making the road
"very heavy for waggons.
"TANNERY:
                  Sales of leather to the public
"realising £325/10/-, were made during the year,
"leather to the value of £196/-/6 was used on Station "account. There are one hundred and ninetythree
"sides of leather in tan, and fiftyeight sides
"in stock, estimated to be worth £425/-/- after
"treatment charges are deducted.
"GENERAL:
                   Eight permanent hands, including a
"mail driver, have been employed, a saddler and two
"men breaking stone for Carrington Weir were employed
"temporarily, also one extra general hand pumping
"and shifting stock through the dry portion of the year.
                   An average of fifteen natives have
"been employed, the males doing stock and general work,
"and the females domestic work."
```

"CONDITION AND TREATMENT OF NATIVES ON MOOLA BULLA AND The health of the natives has "VIOLET VALLEY: "been excellent, no cases of sickness have occurred Native sports were held "except very minor ailments. Some two hundred natives gathered at "at Christmas. The gifts of tomahawks, mirrors, razors, "Moola Bulla. "beads, and handkerchiefs, were much appreciated.
Owing to delay in transport no Shirts and trousers for "blankets have been issued. and flannels for "the old men, dresses for the women, "the young children have been distributed. An average number of one hundred "natives have been camped at Violet Valley, and two "hundred and six head of cattle have been killed for "their use, an average of one hundred and seventyfive "men, women, and children, have been at the main camp
"at Moola Bulla throughout the year, and two hundred "and thirtyone head of cattle have been killed for "their use. One stick of tobacco has been "given to each adult weekly.

VIOLET VALLEY NATIVE STATION, EAST KIMBERLEY: The Officer-in-Charge, Mr. Hector Burness, reported that the season was not a good one, very little rain falling up to December, though ample rain fell after Christmas, the total for the season being 32.43 inches. The stock suffered considerably on account of the lack of early rain, and about one hundred breeders died. There are now two hundred and fifty-nine head of cattle depasturing at the Depot, fourteen calves were branded, and two hundred and twentytwo head were transferred from Moola Bulla for the feeding of natives. There were no losses amongst the horses and mules, and it is considered that the country is more adapted for mule than cattle breeding.

An average number of one hundred and twentyone natives have been rationed at this Depot at a cost of £1,044/6/3, including value of killing cattle.

The improvements include the erection of a hides store, and some necessary repairs to wells, windmills, and troughing.

Continued with good results. In order that seed obtained from America and Egypt might be tried, the Reserve has been declared by the Commonwealth Government a Quarantine Area, for the purpose of growing cotton. The results of the trial of some American

"Lone Star" seed are being awaited, while a parcel of the best quality Egyptian "Sakel" has been obtained for planting during the forthcoming season.

LA GRANGE BAY FEEDING DEPOT, BROOME DISTRICT: The Officer-in-Charge, Mr. C. D. Price, reported that the average number of natives fed monthly was fiftynine, and the cost was £888/3/10. For the previous year the cost was approximately £676.

Seven deaths occurred, six from old age, and one that of a middle aged man from some wasting disease which is common amongst natives in this District but which seldom affects the older people. Practically all the natives at this Depot are well advanced in years and there is no possibility of their being able to do anything to support themselves.

DEPOT FOR DISEASED NATIVES, PORT HEDLAND: The buildings were practically completed during the year and it only remains now to have a new kitchen erected when funds are available to replace the existing lean-to used for the purpose which is most unsuitable. A few shade trees have been sent up to be planted round the buildings, and the Officer-in-Charge reports that some of these, notably the Pepper and Pine trees and Geraldton Wax-plants are doing well. The Depot has been well and economically run and is costing a mere fraction compared with the previous expenditure on the Dorre and Bernier Island Lock Hospitals, though performing equally efficient service. I have referred to the medical side of the question in my remarks under Health.

MISSIONS. In view of the fact that the Annual Returns giving details of the operations of the various Missions have not all come to hand, I am unable to insert the usual statement showing the various activities of these Institutions.

The Manager of Beagle Bay Mission, conducted
by the Pious Society of Missions, reported that they were
supp orting one hundred and fifty natives in addition to seventyfive provided for by the State. The average number of

children attending school was fortyfour. There had been eleven births, two marriages, and no deaths. Improvements included the sinking of a well and theerection of a stock-yard and butcher's shop. A large quantity of vegetables was grown and disposed of. The stock included 3,500 head of cattle, while twenty acres of land were under crop or in process of cultivation.

The Manager of the Presbyterian Mission, Port George IV, reported that the conduct of the natives had been good, and tribal quarrelling had been conspicuous by its absence. The natives generally were becoming more friendly and were more readily leaving their children at the Mission. The health of the people had been good and two deaths occurred. About fifteen acres of land had been enclosed, part of which was under crop, considerable attention having been given to the cultivation of certain tropical crops. Sweet potztoes, pumpkins, peanuts and cotton yielded especially well. Bananas paw-paws, and pineapples were also being grown while tobacco and rice had been tried for the first time, both crops showing satisfactory results. The Mission schooner "W. S. Rolland" was unfortunately wrecked when entering Pender Bay and an expenditure of £327 was necessary to make her again sea-worthy Towards the loss sustained by the destruction of stores when the "W. S. Rolland" was wrecked, the Department made a special grant of £20.

Anglican Mission, conducted by the Australian Board of Missions reported having nearly five hundred natives within his influence, most of whom were partly, and some sixtyseven children and twenty adults wholly, supported by the Mission.

Fortysix children were attending school. There had been some sickness through influenza, three deaths, and three births. The stock included eightseven head of cattle and one hundred and seven sheep. Ten acres were under cultivation for the purpose of supplying vegetables to the Se ttlement

and town of Wyndham. The improvements included the erection of a church, a stone hospital with a grass roof, and stock-yards.

Mr. Sydney Hadley, Manager of the Sunday Island mission, King Sound, reported that his boat had struck a As Mr. Hadley had been reef and suffered considerable damage. particularly unfortunate with his boats, his best cutter having previously been stolen by natives from the other side of the Sound and not recovered, and his Mission practically depended upon obtaining and selling trocas shell for its maintenance, the Department made a special grant of £20 towards repairs. thirty children were attending school under Miss Lock, who seems to have been very successful in her work at this Mission. order to assist the finances of the Institution, Miss Lock, whose courage and devotion to duty are to be commended, in company with some of the married men with their wives, and the older boys and girls, took the schooner out to the Islands in a search for trocas shell. They were absent over a month and the trip appears to have been most successful. The health of the people at this Mission appears to have been good right through the year.

### ABORIGINES ACT AND REGULATIONS.

The several Amendments which I have recommended from time to time to be made in "The Aborigines Act, 1905" have not yet been agreed to. These Amendments are necessary in order to enable the Act and Regulations to be administered with better effect than at present. Regulation 28 has been repealed and the following approved in lieu thereof:-

"No permit shall be granted for the employment of any "male aboriginal or half-caste under the age of "fourteen years, or of any female aboriginal or half-"caste, or (except with the previous written permission "of the Chief Protector) of any male aboriginal of or "over the age of fourteen years, on any premises "licensed for the same of intoxicating liquor."

The doject of the new Regulation is to permit, in special/

special cases only, the employment of male aboriginals upon licensed premises outside the buildings. In some of our Northern towns it is practically impossible to secure white employees to perform certain duties in connection with Hotels, and it has been customary to permit natives to be employed in special cases. The new Regulation places the matter on a proper footing and also absolutely prohibits the employment of females or their presence on licensed premises. Permits issued under this Regulation are to be immediately cancelled if the natives employed thereunder are found within the hotel buildings or in the possession of intoxicating liquor.

### FINANCIAL.

As required by the "Aborigines Act, 1905" a statement of receipts and expenditure on all accounts, embracing both divisions of the Department, is appended hereto. These include the Balance Sheet, Profit and Loss, and Station or Trading Accounts of Moola Bulla Aborigines Cattle Station.

£3,834/11/3, as compared with the previous year, but owing to the fact that there was no balance to the credit of the Trust Fund, as there was at the commencement of 1920, it was necessary to obtain advances beyond the Estimates for the year amounting to £5,695/13/7. Of this excess Moola Bulla Station required £3,808, mainly for the purchase of Stud Stock and a Donkey Team for Station transport, neither of which were provided for on the Annual Estimates.

Receipts derived from Moola Bulla Station and paid direct to the Treasury, amounted to £6,139/2/3.

In conclusion I desire to thank Honorary

Protectors, numbering thirtyseven, Police Officers and others
throughout who have assisted in the care of the natives, for
their services during the past year.

(Sgd) A. O. Neville
