The system adopted in the Government Schools of this Colony corresponds in its main features with the national system of Ireland. Certain modifications however have been introduced with the view of meeting the special requirements and circumstances of the colony.

The primary object of the Government has been to secure, on the basis of religion, a sound and serviceable education for the children of the middle and lower classes, without any distinction of religious sect; and of which all can avail themselves without fear of interference with their religious convictions.

The proceedings of each day are commenced with general instruction from the Scripture Lesson Books, in which the Ministers of all religious denominations co-operating with the Board are invited to take part as often as they please, stipulating only that they abstain from alluding to those differences of opinion which unhappily divide the Christian

Church, but no children are required to attend without their parent's sanction.

Not less than five hours of every school day are devoted to secular instruction.

The General Board have expressed their willingness to facilitate to the utmost of their power any arrangements Ministers of religion may wish to make for the special instruction of the children of their own denomination in the school room at any hour of the day, before or after the time set apart for general religious and secular instruction.

For the purpose of facilitating such special instruction, the Board are willing to supply Bibles on the application of any Minister, co operating with the Board.

The increasing number of pupils attending the Government Schools affords every reason for supposing that the system meets with the general approval of the public.
