on it until one o Clock., here we fell in
with a River course or Channel containing ports
of salt water its direction North. halted
until half past one; at ¾ past we came
on a River flowing E. & S. this was salt
we traced it to the Bay and called it Toby's

Wednesday 25. we ~~continued~~ recommenced our journey passing through a Spicewood & Birch Swamp which to clear more promptly we took a Southerly direction, its outer skirts were still on fire in detached places and part of the ground we walked over had been but a few hours before the scene of a considerable conflagration which doubtless must have been observed on board the Ellen in this tract we passed over half a mile of Ground & debouched on to a plain changed our course to S.E & for one mile we passed over some good Land at the end of which we were gratified by finding ourselves on the banks of an apparently large River its width being at this point about 33. yards wide its banks very steep (12 to 20 feet) and with a considerable depth of water — Numerous flocks of Wild Duck were floating in tame tranquility on its bosom hardly noticing our approach and nor were they disturbed by it: they found a two fold security in the depth of the River and the absence of small shot — Mr. S. Burfield being only one Musqueteer with a small store of ball Cartridges — we named this River the Lenoy — we sought a passage to cross along its rich & Loamy banks & in so doing found it to wind to the South & the West — we at last came to a Native bridge on which we crossed over and at 6 minutes ~~half~~ past six we halted nearly opposite the point at which we first made it. Where we
