### **3. ZOO ANIMALS**

Manila folder containing 9 pieces of original artwork

Most of the animals in the Rio de Janeiro Zoo are native to Brazil: the jaguar, macaw, three-toed sloths, ant eaters and spider monkeys. The elephant and lion, like Steve, are from Africa.

Each animal has its own characteristic: the jaguar paces impatiently; the spider monkeys chatter; the lion is old, tired and hungry; the elephant is greedy; and of course, the sloths do nothing at all!
